

Allied – Exxon Mobil PCI NeXGen Systems – Release Notes

Allied Versions: MxN5000N or Newer
Report Date: June 23, 2008
Submitted by: Mike Vogt, Allied Electronics, Inc.

Gilbarco Systems

Version(s)	Status	Release Notes
MGN5000N	QA	<ol style="list-style-type: none"> 1. Initial version of Exxon Mobil software that adds PABP compliance. 2. When requesting a PPG discount for a non-existent grade, the dispenser would enter a non-sequitor state. PPG discounts for non-configured grades are now ignored. 3. Flex host prompting was inconsistent based on message content. The host processing sub-system now parses the stream such that if data are missing or inappropriate. 4. Fuel product tables are now written when received. 5. Fixed issue where using a non-PCI compliant POS to a PCI compliant MGN build would cause NXG to warm start. 6. Fixed issue where configuring a POS count of 0 would cause cards to be billed twice – sending a POS count of 0 will now result in a message range error. 7. Added support to force the use of a longer delay when sending data messages (e.g. price changes and presets). The dispenser model field in the DIS M message to must be set to a '9.'
