

Ensuring Refueling Assistance at the Pump

FUELCALL ADDRESSES ALL IMPORTANT REGULATORY REQUIREMENTS CITED DURING THE NACS WEBINAR ON MARCH 1, 2012.

WITH FUELCALL

- You will reduce exposure to needless and expensive litigation. *No one using FuelCall has ever been subject to a lawsuit.*

- You will protect your investment in the newest generation of dispensers. *State-of-the-art marketing dispensers are made compliant with the FuelCall workaround solution.*

HERE'S WHY

FuelCall's Universal Design

Our workaround solution meets the required reach range of 48 inches, *regardless of the type of dispenser or the pump island height.*

FuelCall Accessibility Signs

The Department of Justice looks for accessible dispensers clearly marked with a canopy sign and a posted telephone number. *These signs are included in FuelCall's standard kit at no extra charge.*

FuelCall Hours of Operation Signs

The law requires you to offer refueling assistance at the pump when two or more people are on duty. *FuelCall gives you the flexibility to post only those hours when two or more attendants are scheduled.*

FuelCall is the only product in the market that is universally designed to work with every dispenser. With FuelCall, you will not only accomplish what is legally required - you will guarantee an outstanding customer experience.

Ask us how to retrofit your dispensers today!

HOW FUELCALL® WORKS

Signage on your station's marquee (a) lets disabled drivers know that assistance is available. On the designated island (b), signs clearly mark the accessible gas pumps. Using the **BigBell™** touch pad (c), customers alert your staff that they need assistance. When the chime rings inside the convenience store (d), the attendant goes out to assist the driver.

"I've used a wheelchair for 25 years and FuelCall® is...a solution that can help me, and thousands like me, become your loyal customers."

- Missouri State Senator Chuck Graham

Product Specifications

FuelCall® is simple, affordable and easy to use. Components include:

- **BigBell™ Transmitters** – consistent with ADA law, and meets the Department of Justice "fist test"
- **Wireless Chime Receiver** – easily heard by all employees
- **Two Steel J-Bars** – for proper mounting of BigBell™
- **Signage** – For posting on canopy pillar - above the designated gas dispenser and roadside marquee
- **Installation Tools Included**
